

# SERIES 50 / 52

## Resilient Seated Butterfly Valves

Wafer, Lug Body

[delvalflow.com](http://delvalflow.com)

1-833-DELVAL1

# STANDARD FEATURES

## Quality & Performance

DelVal Flow Controls provides a wide range of quality products with the reliability you can count on. All Series 50/52 valves are manufactured in ISO 9001 certified facilities with a robust quality management system and according to BS EN 593 standard.

## Design Construction and Features

### 1. Stem Connection

Stem connection available in standard DelVal sizes or optional sizes to match secondary top plate drilling.

### 2. Top Plate Drilling

Top plate double drilled to fit DIN EN ISO 5211 dimensions and secondary bolt circle dimensions. All handles, gear operators and pneumatic DelTorq actuators are designed to mount directly to DelVal Valves.

### 3. Heavy Duty Body

Heavy duty one-piece body has extended neck for 2" piping insulation. Standard coating is two layers of epoxy polyester powder coating with semi-gloss finish for excellent corrosion resistance.

### 4. Locating Lug

Two flange locating holes for sizes up to 12" and four flange locating holes from size 14" to 24" ensure easy alignment of valve during installation. They meet ASME CL125/150 or other international drilling standards.

### 5. Disc

High strength disc with polished edge and hubs. Nylon PA 12 coated disc option ensures excellent corrosion resistance to several chemical media. The hard, non-porous sintered polymer has very low hygroscopicity and is suitable for use in drinking water and non-alcoholic food safe applications.

### 6. Seat

Heavy duty square-grooved seat design has molded O-ring seals to serve as flange gaskets. EPDM/NBR (BUNA-N) seats are peroxide cured to yield superior thermal and chemical resistance.

### 6a Center-LOK® Seat Design

### 6a. Seat Design

Unique Center-LOK® seat design virtually eliminates any seat movement during the seating and un-seating of the disc, and isolates the body and stem from process media.

### 7. Disc - Seat Sealing

Precision machined radius on the upper and lower disc hubs presses against upper and lower seat sealing faces to achieve primary sealing between disc and seat.

### 8. Secondary Seal

Double O-rings are molded in both upper and lower journals, providing a superior secondary seal.

### 9. Stem

One piece stem with close tolerance double D drive eliminates the need for disc screws or taper pins.

### 10. Stem Retention System

Unique stem retention system provides blow-out proof stem and easy assembly and disassembly of valve.

### 11. Bushing

Heavy duty bushing absorbs the forces acting on the disc-stem assembly due to line pressure.

### 12. Stem Seal

Bi-directional 'U' cup stem seal.

16	Plug	ISO 3506 A2-70	
17	Key	BS 970 En8	
18	Socket Head Cap Screw	ISO 3506 A2-70	

#Silicone seat configuration applicable up to PN6 rating only.

\*Other materials may be available on request.

\*\*Recommended spares.

CI = Cast Iron, DI = Ductile Iron, CS = Carbon Steel, SS = Stainless Steel.

## Standards and Specifications

DelVal Series 50/52 Butterfly Valves are designed and manufactured to meet the requirements of the following general industry standards:

**Design:** Full compliance to BS EN 593, general compliance to API 609 & MSS SP 67

**Face to Face:** BS EN 558-1 Series 20, API 609 Category A, ISO 5752 Series 20, MSS SP 67, ASME B16.10

**Testing:** BS EN 12266-1, API 598, MSS SP 67

**Flange Standard:** ASME B16.5 Class 150, ASME B16.47 Class 150 Series A, Other International Standards

**Body Style:** One-Piece

**\*Temp Range:** -29°C to 200°C,  
-20°F to 390°F

**Size Range:** 2" to 40"

## Seat Temperature Limits

Seat Type	*Temperature Limits	
	Lower Limit	Upper Limit
EPDM/WHITE EPDM	-20°F (-29°C)	302°F (150°C)
NBR (BUNA-N)/WHITE NBR (WHITE BUNA-N)	0°F (-18°C)	212°F (100°C)
Viton® (FKM)	0°F (-18°C)	390°F (200°C)
*Silicone	-58°F (-50°C)	390°F (200°C)

#Maximum pressure rating limited to 6 Bar.

Viton® is registered trademark of E.I. DuPont.

\*Temperature range shall be the lesser of the seat temperature or disc coating temperature.

## Pressure Rating

Inch	DN	PSIG	BARG
**2" to 24"	50-600	230	16
2" to 24"	50-600	200	14
2" to 12"	50-300	175	12
2" to 40"	50-1000	150	10
2" to 40"	50-1000	87	6
2" to 40"	50-1000	50	3.5

\*\*Optional, consult factory for details.

## End-of-Line Service

Lug body valves may be used in end-of-line service with downstream piping removed.

2" to 40" (DN 50 to DN 1000) lug type butterfly valves are suitable for operation without a downstream flange installed, the dead-end pressure ratings are equal to the values stated above.

## Operator Information

Valves up to size 12" can be supplied with lever handles for manual operation. Optional accessories for hand-lever operation can be provided for various flow control requirements. Pad-lock can also be provided to prevent unauthorized operation.

Valves of all sizes can be direct mounted with gear operators for manual operation. Gear operators can also be attached with chain-wheel operators to open or close valves located on pipelines at high elevations.

All valves can be direct mounted with pneumatic actuators or electric actuators and accessories for complete on-off automation or modulating control. Valves can be mounted with manual overrides.

# 100% TESTING 100% SERIALIZATION
